

# Nathan Woodburn

Linux Systems Administrator

## Profile

System Administrator specializing in Linux, Docker, and server deployments. Experienced in managing Proxmox, networks, and CI/CD pipelines. Implementing Python automations to optimize system operations. Ability to deploy and maintain server environments, self-hosted services, and web applications while ensuring reliability, scalability, and security.

## Experience

### Technical Support Specialist Namebase - Remote

Oct 2022 - Jun 2025

- Provided technical support for users, focusing on domain setup, configuration, and troubleshooting.
- Worked with engineering teams to report bugs and suggest product improvements.
- Diagnosed complex DNS issues including nameserver propagation and zone file errors.
- Gained hands-on experience with recursive and authoritative DNS, DNSSEC, and decentralized naming.
- Engaged with the community through social platforms and represented Namebase at conferences.

### Small Business Owner Nathan 3D Printing Service

Feb 2020 - Dec 2023

- Operated a custom 3D printing and CAD design business independently.
- Handled client communication, design iteration, and order fulfillment.
- Built end-to-end project management and technical design skills.

## Projects

### Server Lab Proxmox, Networking, Linux, DNS

- Maintain a personal physical server running Proxmox hypervisor.
- Host multiple virtual machines across three VLANs with isolated firewalls for enhanced security.
- Provide DNS and recursive resolver hosting services for external users.
- Host a suite of self-hosted services such as Gitea, Authentik, Vaultwarden and Nextcloud.

### Personal Website Python 3, Flask, Docker, CI/CD

- Designed modular web application architecture with Flask blueprints and reusable templates.
- Managed containerized deployment using Docker on a dedicated server, ensuring consistency and scalability.
- Implemented CI/CD pipelines for automated testing, building, and deployment from Git.
- Integrated dynamic content and interactive features while maintaining secure and optimized server operations.

## Education

Bachelor of Computing  
Australian National University  
2022 - Present

Discovering Engineering  
Australian National University  
Years 11 - 12

Completed enrichment program in engineering disciplines, CAD modeling, and design thinking

### Home Educated Self-Directed Learning

Developed passion for technology through independent exploration of programming, system administration, and server management.

## Skills

- Python 3
- Git
- Docker Containerization
- DNS
- Linux administration
- Technical troubleshooting
